SUMMARY

Full Stack Product Engineer experienced in building cross-platform mobile applications and websites, backend services, REST APIs, and AI-powered products. Skilled in React Native (Expo), TypeScript, Node.js, Express, PostgreSQL, Prisma, Supabase, Firebase, and cloud services. Experienced delivering products from MVP to production with focus on scalable architecture, performance, security, and user experience.

TECHNICAL SKILLS

Mobile Development: React Native, Expo, TypeScript, React.js, Next.js

Backend: Node.js, Express.js, REST APIs, API Design, Authentication, Backend Architecture

Databases: PostgreSQL, Prisma ORM, Supabase, Database Design

Cloud & Tools: Firebase, AWS, Google Cloud, Git, GitHub, CI/CD workflows

Integrations: OpenAI APIs, Claude APIs, Stripe, AdMob, Analytics, Push Notifications

Architecture: Modular Architecture, System Design, MVP Development, Product Scaling

EXPERIENCE

Contract Mobile Developer

BigCut LLC — Remote | April – May 2026

- Developing cross-platform mobile applications for iOS and Android using React Native (Expo).
- Built applications integrating AI features, payments, advertisements, analytics, and backend services.
- Integrated Supabase, PostgreSQL, and Node.js APIs into production applications.
- Designed reusable application architecture for scalable deployments.

Product Engineer / AI Systems Lead

Trivian Technologies — Remote | Jan - June 2026

- Leading development of an API-first AI governance middleware platform.
- Designed system architecture, API contracts, evaluation workflows, and backend integrations.
- Coordinated engineering workflows across AI, backend, and product teams.
- Built technical systems focused on reliability, scalability, and production readiness.

Founder / Product Engineer

AOT Network — Remote | 2025–Present

- Building software products including mobile applications, websites, and AI-powered systems.
- Designed product architecture, user workflows, and scalable development processes.
- Delivered client and internal projects from idea stage to production.

Developer Advocate / Technical Contributor

Web3 Ecosystems | 2024–Present

- Supported developer onboarding and technical adoption initiatives.
- Created technical documentation and developer resources.

PROJECTS

AI-Powered Mobile Applications

- Built cross-platform applications with AI features, real-time functionality, authentication, and monetization systems.
- Implemented backend integrations, data management, and scalable app architecture.
- Built Advanced Real-time quantitative analysis platforms for trading pairs

AI Governance Middleware

- Developed API-based AI evaluation workflows for assessing and controlling AI outputs.
- Combined deterministic rules with AI-assisted risk analysis.

TOOLS

React Native • Expo • TypeScript • JavaScript • Node.js • Express.js • PostgreSQL • Prisma • Supabase • Firebase • AWS • GitHub • Python • AI APIs

TARGET ROLES

Full Stack Developer • Mobile Developer • Backend Developer • Product Engineer
